- (\*) 3.1. Capstone Project name:

English: Online Medical Consultant System

Vietnamese: Hệ Thống Tư Vấn Y Khoa Trực Tuyến

Abbreviation: OMCS

- (\*) 3.2. Main proposal content (including result and product)
  - a) Theory and practice (document):
  - b) Program:

Supervisor 2

An online system that allows patients and doctors exchange information so that doctors can help patients to diagnose their medical issues and give advice. The system should support main features:

Doctor:

Real time conversation with patient

View patient history medical records

Build medical profile

Patient:

Real time conversation with doctor, support video captures

Add/update medical records

(Sign and full name)

Vote/comment doctors

Supervisor (If have)	On behalf of Registers	
	HCM, date 05/05/2014	•••
4. Other comment (propose all relative thin		
c) Other products:		

(Sign and full name)

#### Part A. Presentation Summary

# ONLINE MEDICAL CONSULTANT SYSTEM

**GROUP 2** 

## About us

- Supervisor:
  - NGUYỄN HUY HÙNG
- Team Member
  - TRẦN NGUYÊN TIẾN SỬ
  - TRẦN CAO DANH

# Agenda

- Scenario Problem
- Propose our solution
- Technologies
- System Process Model
- Main features
- Demo
- Disadvantages
- Future Plan

**OMCS** 

## Scenario Problem

Nowadays, Vietnam hospitals usually are overwhelmed with patients<sup>[1]</sup>.

Tinmoitruong (2012). Bệnh viện quá tải... dân khổ. http://kinhtemoitruong.vn/news/Moi-truong-suc-khoe/Benh-vien-qua-tai-dan-kho-389/.

## Scenario Problem

- Go to hospital not always a good choice due to
  - Travelling cost
  - Wasting time
  - Unsafeness<sup>[2]</sup>

http://bestfinancenetwork.com/

**OMCS** 

# Scenario Problem

**OMCS** 

## Scenario Problem

Existing solutions in Viet Nam:

**TƯ VẤN TRỰC TUYẾN** www.tuvansuckhoe24h.com.vn

#### Scenario Problem

Disadvantage of current system:

- Lack of interaction between patients and doctors
- Hardly can provide high quality consulting service
- Patient cannot able to manage their own profile information, medical heath record

**OMCS** 

# Propose our solution

We see that there are many cases that patients don't need to go to the hospital quite often because those can easily conduct via internet.

**OMCS** 

http://www.crshealthcareitgroup.com/

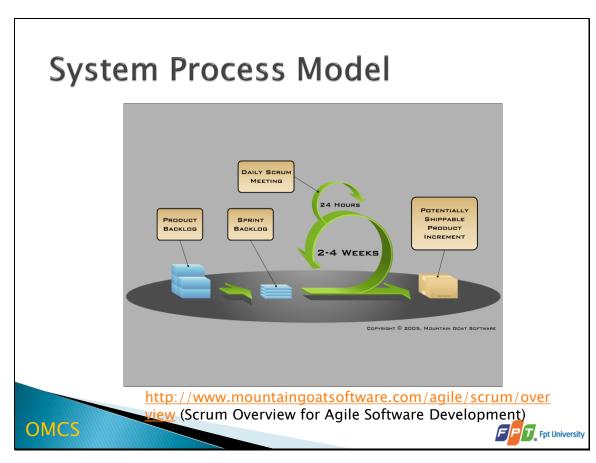

# Propose our solution

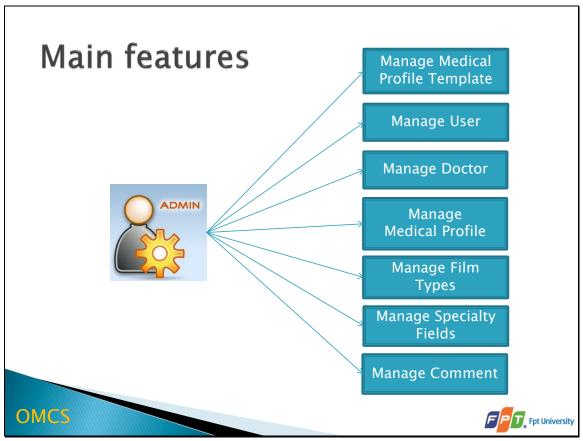

#### Advantages:

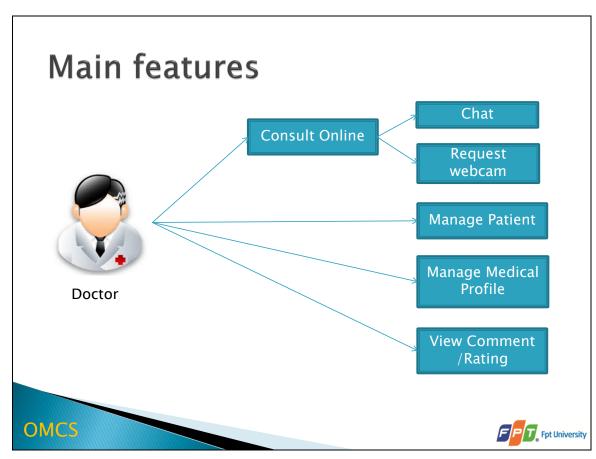

- Interaction between patients and doctors.
- Provide ways to build medical profile online.
- Patient can manage their own profile information, medical heath record.
- Patient can comment/rating for doctor.

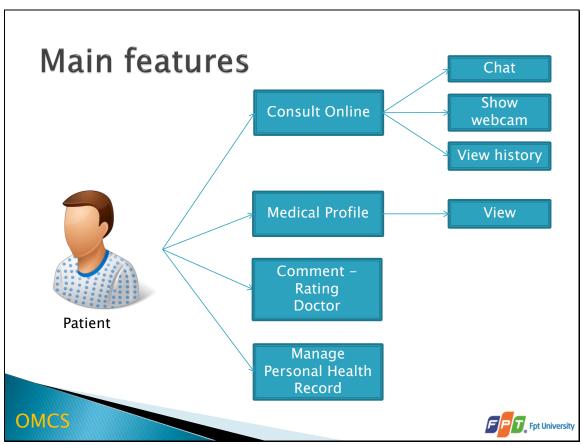

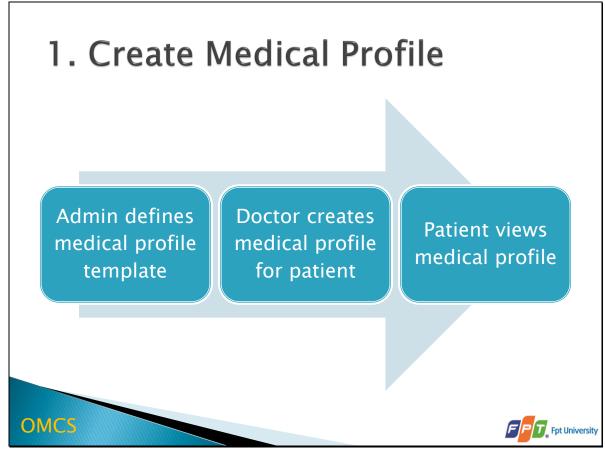

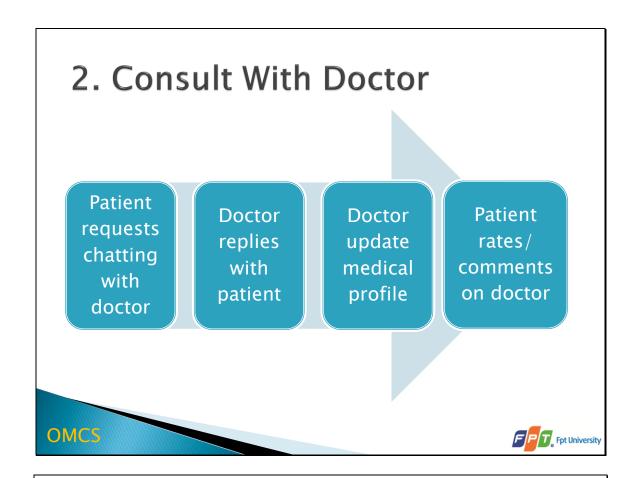

# Disadvantages

- The system is intended for using in one hospital or clinic. This system doesn't support yet:
  - Exporting medical profile.
  - Managing prescription.
  - $\,{}^{_{\odot}}$  Managing process of a hospital.
  - Custom layout for medical.
  - Tracking changes in a medical profile
- This system not intend to replace the current medical treatment processes in hospital.

# **Future Plan**

- The system is intended for many hospitals to share their medical profile.
- ▶ This system will support:
  - Exporting medical profile.
  - Managing prescription.
  - Managing process of a hospital.
  - Custom layout for medical.
  - Tracking changes in a medical profile

**OMCS**
